

If I were Mayor Essay

If I were mayor of Waterloo, Iowa I would...

I would first start off by renewing old buildings and giving citizens opportunities to open up their own businesses. I would also donate some money to help those citizens open up their business. I will also open up homeless shelters for people that have nowhere to go especially if they have kids. I would build some run away teen centers for teenagers that have nowhere to go, get kicked out or are having problems at home. I believe that bullying is not okay and should be stopped. I would go to schools personally and talk about how bullying is not okay. I will help open up new and exciting places where families can spend time together and bond. Families could also go out to eat out at new restaurants and have a fun time with each other. I would help stray and injured animals that need somewhere to live and be treated. With that new animal shelters would be built too. There the strayed and injured animal will be taken care of and will have somewhere to live. A new holiday will be announced for all the police officers, doctors and firefighters. On this special day all these wonderful people will be appreciated for their hard work. How firefighters keep us safe from fires. Doctors who treat the sick and injured and police officers for making this a better place. There will also be new parks where children can run around and have fun. Also there will be ice cream because ice cream is good and everyone deserves a treat. This is what I'd do if I were mayor.
